

livestock production

loss of access to prime grazing and freshwater resources due to military lease.

lack of access to water

militarization

Sedimentation effecting coral reefs.

Fires in General, Large scale

sheet and rill erosion

Erosion and Sedimentation, fires and deforestation

plant productivity/ degraded plant condition/ fire

Invasive species/ coconut rhinoceros beetle

pest pressure

soil quality/ contaminants

Soil contamination from military/ heavy metal

illegal dumping sites,

marine debris!
litter!

Shared property doesn't meet NRCS land ownership.

sustainable funding for conservation programs

sewer water infrastructure

flooding in Garapan

Ensure that developers utilize stormwater BMPs to minimize Land Bases Sources Poluttion

Lack of funding/ wetland and health of watershed,

production is not meeting Island demand

typhoons are definitely detrimental to crop production especially to fruit bearing trees (along with the plethora of problems to infrastructure and lower income communities)
